Chris Harley

PROFESSIONAL SUMMARY

Design-minded Frontend Developer with 8+ years building high-performance, visually polished websites. Specialize in Next.js, Astro, and headless CMS (Sanity, Contentful) using an AI-accelerated context engineering workflow to go from design to deploy faster. Blend UI design craft with strong frontend engineering fundamentals gained at a Fortune 500 fintech. Seeking a creative frontend role at an agency or in-house brand team.

CORE COMPETENCIES

Frontend: React, Next.js, Astro, TypeScript, JavaScript, HTML5, CSS3

Design: UI/UX Design, Figma, Responsive Design, High-Fidelity Mockups

CMS & Data: Headless CMS (Sanity, Contentful), Content Modeling, APIs

Workflow: Context Engineering (Spec-Driven AI), Git, Performance, Accessibility

PROFESSIONAL EXPERIENCE

Customer Interface Specialist (Contract) | NAVEX | Mar 2025 – Present

- Maintain and update 2,500+ client-facing web interfaces alongside one other developer; execute content changes in JS files with sub-24-hour turnaround and zero critical UI defects.
- Partner with cross-functional teams to align UI updates with product requirements, improving client satisfaction for the interface layer.

UX Engineer | Freelance | May 2018 – Present

- Design and develop full-cycle websites for small businesses and personal brands using Next.js, Astro, and headless CMSs. Spec driven development, Design mcp / code integration,, LLM pair programming) to compress project timelines by ~30% without sacrificing quality.
- Synthesize UX design methodologies with frontend engineering principles to build intuitive, user-centric interfaces for complex client requirements.
- Continuously evaluate and integrate emerging web technologies into production workflows, ensuring high-performance, future-proof digital solutions for all client projects.

Associate Software Engineer | Progressive Leasing | Dec 2022 – Mar 2024

- Built a credit card management feature enabling users to securely add/store payment methods, contributing to a 15% increase in on-time payments.
- Improved React UI performance with lazy loading and memoization; mentored a junior developer, cutting onboarding time in half.
- Worked in a full-stack environment (C#, .NET, Angular) before specializing in frontend design.

Division Operations and Planning Manager | US Army | Jun 2005 – 2015

- Directed training for 400+ personnel; served as liaison between units and senior officers, maintaining 100% regulatory compliance. Recognized for leadership and discipline, directly transferable to mentoring developers and managing complex projects.

EDUCATION

DigitalCrafts — Software Engineering Bootcamp

General Assembly — UX Design Immersive

Berklee College of Music — Bachelor's Degree

CERTIFICATIONS

- **Google UX Design Certificate**
